

UIU

QUICK GUIDE

UIU – User interface unit

WMD – Water management device

DESCRIPTION

The UIU links to the WMD to display the total credit remaining and the total consumption of the WMD. The UIU once instructed to sync to the WMD by pressing ## will display information in this sequence:

1. Total credit remaining will be displayed by the symbol ‘L’
2. Total consumption of the device displayed by the symbol ‘m3’
3. Device activation time. (This display is for free basic water allocation and not prepayment)
4. The UIU will return to the current time

The above displays will be showed at every ##sync. Please note the device as a wireless range of 100 - 150 meters line of sight.

will check remaining totals

#999#meter number# will sync UIU to a WMD

These are the basic # commands.
